**SEM Committee Decision for the Regulatory Authorities in relation to Mod_15_11
(Recommendation Report FRR_15_11_V1.0)**

Dear Sherine,

On 3rd May 2011, the Modifications Committee submitted its Modification Recommendation Report with regard to a Modification Proposal, Mod_15_11 (Amendment to Deload Break Point Glossary Definition), in accordance with paragraph 2.213 of the SEM Trading and Settlement Code (the Code).

This Modification Proposal, which was raised by the Market Operator, seeks to provide clarification to the treatment of Deloading from Minimum Stable Generation to zero by amending a related definition in the glossary.

The SEM Committee notes that the Modifications Committee agreed unanimously that the Modification Proposal furthers the Code Objectives “to facilitate the efficient discharge by the Market Operator of the obligations imposed upon it by its Market Operator Licence” and that the Modification should be made effective on a Trading Day basis on the next Working Day after the Regulatory Authorities’ decision is made. The SEM Committee further notes that the Modification requires no changes to the Central Market Systems.

Considering the above, and in accordance with paragraph 2.218 of the Code, the SEM Committee directs that a Modification be made in accordance with the Final Recommendation Report of the Modifications Committee (FRR_15_11_V1.0), for the avoidance of doubt based upon the legal drafting set out in Appendix 1 of that report. The Regulatory Authorities therefore direct that a Modification be made on a Trading Day basis with effect from the next Working Day after the date of this letter.

Yours sincerely,

Sheenagh Rooney
Manager - Wholesale Electricity Market
