³ In accordance with SEM Committee decision <u>SEM-18-030</u>, DSUs with a Maximum Down Time of more than 6 hours should apply the appropriate De-Rating Factor based on the values set out in Table 1. DSUs with a Maximum Down Time of 6 hours or less should apply the appropriate De-Rating Factor based on the values set out in Table 4.

⁴ The final De-Rating Factor for Interconnectors is calculated by multiplying the marginal De-Rating Factor that applies to their size class by the External Market De-Rating Factor. The External Market De-Rating Factor for this auction will be 0.60 for interconnectors from Great Britain to Ireland or Northern Ireland.

⁵ New Technology (i.e. a technology for which there is currently no technology class) should use the System Wide derating curve.

2.2 Final Capacity Requirement

D.3.1.2 (b) the final Capacity Requirement for the Capacity Year to be used in the Capacity Auction;

The Capacity Requirement is determined by the Regulatory Authorities in accordance with Section D.3.1.3 (b) of the Capacity Market Code. The approved Capacity Requirement is set out in Table 6 below:

Table 6 - Capacity Requirement

Сара	city Requirement (MW)
	6,748

The actual capacity to be auctioned is subject to upward adjustment to account for a number of considerations and will be set out in the final Demand Curve and Locational Capacity Constraint Required Quantities set by the Regulatory Authorities and published in the Final Auction Information Pack.

2.3 Indicative Demand Curve

D.3.1.2 (c) an indicative Demand Curve to be used in the Capacity Auction;

The Demand Curve is determined by the Regulatory Authorities in accordance with section F.3 of the Capacity Market Code. The approved **indicative** Demand Curve is set out in Table 7 below:

Table 7 - Indicative Demand Curve to be used in the Capacity Auction

De-Rated Capacity (MW)	Demand Curve Point (€/MW per year)

Note: The final Demand Curve will be set by the Regulatory Authorities and published in the Final Auction Information Pack.

2.4 Locational Capacity Constraints

D.3.1.2 (d) for each Locational Capacity Constraint for the relevant Capacity Year to be used in the Capacity Auction, the final nodes on the Transmission System (and the Distribution System, as applicable) to which the Locational Capacity Constraint applies;

In accordance with Section C.2 of the Capacity Market Code and the approved Locational Capacity Constraints methodology (SEM-21-019), the System Operators calculate and submit to the Regulatory Authorities any Locational Capacity Constraints applicable to the Capacity Year for their determination. The approved Level 1 and Level 2 Locational Capacity Constraints are set out in Table 8 and Table 9 below:
