**SEM Committee Decision for the Regulatory Authorities in relation to Mod_03_10
(Recommendation Report FRR_03_10)**

Dear Aisling,

On 19th February 2010, the Modifications Committee submitted its Modification Recommendation Report with regard to a Modification Proposal, Mod_03_10 (Trading Site Definition Amendment), in accordance with paragraph 2.213 of the SEM Trading and Settlement Code (the Code).

This Modification Proposal, raised by the Market Operator, seeks to correct the definition of Trading Site under the Code so that Demand Side Units (as well as Aggregated Generator Units) are excluded from the requirement that all Generator Units are covered by a single Connection Agreement or in the event no Connection Agreement exists, all such Units are located on a Contiguous Site.

The SEM Committee notes that the Modifications Committee agreed unanimously that the Modification Proposal seeks to satisfy the Code Objective "to provide transparency in the operation of the Single Electricity Market" and that the modification should be implemented on a Settlement Day basis one Working Day after the decision is made.

Considering the above, and in accordance with paragraph 2.218 of the Code, the SEM Committee directs that a modification be made in accordance with the Final Recommendation Report of the Modifications Committee (FRR_03_10), for the avoidance of doubt based upon the legal drafting set out in Appendix 1 of that report, on a Settlement Day basis with effect from the next Working Day after the date of this letter.

Yours sincerely,

Sheenagh Rooney
Manager – Wholesale Electricity Market
