**SEM Committee Decision for the Regulatory Authorities in relation to Mod\_28\_10  
(Recommendation Report FRR\_28\_10\_V1.0)**

Dear Aisling,

On 20<sup>th</sup> December 2010, the Modifications Committee submitted its Modification Recommendation Report with regard to a Modification Proposal, Mod\_28\_10 (Clarification of treatment of Netting Generator Units) in accordance with paragraph 2.213 of the SEM Trading and Settlement Code (the Code).

This Modification Proposal, which was raised by SEMO, seeks to clarify the wording in the Code regarding Netting Generator Units, in particular regarding the provision of Technical Offer Data for these units.

The SEM Committee notes that the Modifications Committee agreed unanimously that the Modification Proposal furthers the Code Objectives "to facilitate the participation of electricity undertakings engaged in the generation, supply or sale of electricity in the trading arrangements under the Single Electricity Market" and "to provide transparency in the operation of the Single Electricity Market" and recommended that the Modification should be made effective on a Settlement day basis within one working day of the decision by the Regulatory Authorities.

Considering the above, and in accordance with paragraph 2.218 of the Code, the SEM Committee directs that a modification be made in accordance with the Final Recommendation Report of the Modifications Committee (FRR\_28\_10\_V1.0), for the avoidance of doubt based upon the legal drafting set out in Section 10 of that report. The Regulatory Authorities therefore direct that a Modification as set out in FRR\_28\_10\_V1.0, be made on a Settlement Day basis with effect from the next Working Day after the date of this letter.

Yours sincerely,

Sheenagh Rodney,  
Manager - Wholesale Electricity Market
