Dear Aishling,

Consultation for Modification Proposal MOD_34_09: Global Aggregation

Thank you for this opportunity to respond to the above consultation.

Viridian Power and Energy (VP&E) has participated in the Global Aggregation Working Group and commends those involved for the good work that has been done to develop a robust and expedient solution for Global Aggregation.

Of the options presented for consultation VP&E considers that Option A+ and Option E both have merit. Whereas Option E applies a detailed smear of the residual volume across all suppliers it is more complex than Option A+ and provides less certainty to customers. Option A+ has the advantage of being clear and simple to implement and gives the customer the certainty of a tariff they would not seem to have under Option E.

On balance therefore VP&E favours Option A+, noting in particular that adopting Option A+ need not prevent developing Option E in the future.

Yours sincerely
