**SEM Committee Decision for the Regulatory Authorities in relation to Mod_41_09
(Recommendation Report FRR_41_09)**

Dear Stephanie,

On 14th January 2010, the Modifications Committee submitted its Modification Recommendation Report with regard to a Modification Proposal, Mod_41_09 (Aggregated Generator Unit Capacity Change), in accordance with paragraph 2.213 of the SEM Trading and Settlement Code (the Code).

This Modification Proposal, raised by the TSO, seeks to modify the Code to allow for an increase or decrease in the number of individual Generators within an Aggregated Generator Unit. The Code correctly only allows for an increase in this regard.

The SEM Committee notes that the Modifications Committee believes that the Modification Proposal furthers the Code Objectives 'to facilitate the efficient, economic and coordinated operation, administration of the Single Electricity Market' and voted unanimously to recommend the Modification Proposal to the Regulatory Authorities. The Modifications Committee also recommends that Mod_41_09 should be implemented on a Trading Day basis on the next Working Day after the decision is made.

Considering the above, and in accordance with paragraph 2.218 of the Code, the SEM Committee decides that a modification be made in accordance with the Final Recommendation Report of the Modifications Committee (FRR_41_09), for the avoidance of doubt, based upon the legal drafting set out in Appendix 1 of that report, together with the further changes in Section 10. The Regulatory Authorities therefore direct that the Modification, as set out in FRR_41_09, be made on a Trading Day basis with effect from the next Working Day after the date of this letter.

Yours sincerely,

Sheenagh Rooney

Manager – Wholesale Electricity Market
