SEM Committee Decision for the Regulatory Authorities in relation to Mod_19_18 (Final Recommendation Report FRR_19_18)

Dear Esther,

On 5 September 2018, the Modifications Committee submitted its Modification Recommendation Report with regard to Modification Proposal Mod_19_18 - Part B Housekeeping - in accordance with Paragraph B.17.18.1 of Part B of the SEM Trading and Settlement Code (TSC).

The Modification Proposal Mod_19_18 was submitted to the Modifications Committee by the Single Electricity Market Operator (SEMO) on 7 June 2018.

The Modification Proposal seeks to address a number of housekeeping items which have been identified since the I-SEM rules were designated. While there are a significant number of these items none of them are changes of approach or to the market design. These items fall broadly under four classifications as follows:

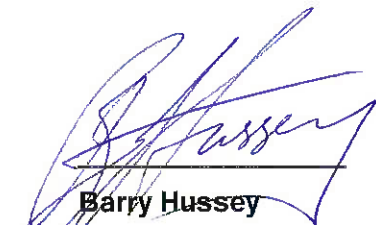

- Incorrect References – errors in paragraph references likely due to changes in the structure of the Code as drafting progressed
- Variable Errors – Variable acronyms with incorrect letters used or incorrect subscripts

- Typographical errors – duplicated words, missing words or incorrect capitalisation
- Drafting Errors – wording which is either unclear or incorrect

The Regulatory Authorities note that a presentation was made to the Modifications Committee meeting on 21 June 2018. The Regulatory Authorities also noted that the members of the Modifications Committee were unanimous in their view that the Modification Proposal would better facilitate the achievement of the Code Objective relating to providing transparency to the operation of the SEM.

Considering the above, and in accordance with Paragraph B.17.20 of Part B of the TSC, the SEM Committee direct a Modification in accordance with in Appendix 1 of FRR_19_18. This Modification shall become effective one Working Day after the date of this letter.

Yours sincerely

Barry Hussey
Manager
