

**23<sup>rd</sup> November 2022**

Agreed Procedure Notification

Mod\_14\_22 Removal of the requirement to post De-registration Consent Orders

## 1 MODIFICATIONS COMMITTEE MEETING 113 MINUTES

Proposer SEMO

The Proposer went through the Modification Proposal noting that there would be a minor change to Agreed Procedure 18 in relation to the process of issuing de-registration documentation to stakeholders. It was advised that the added requirement of issuing documents by Registered Post was unnecessary and by removing it, it would reduce paperwork.

A Supplier Member understood the rationale above and but noted that registered post provides the trackability needed in these circumstances. It was suggested that a confirmation of receipt could be added for further assurance of delivery and the Proposer agreed to this. An agreement was made that this extra step would be added into the AP Notification.

## 2 NOTIFICATION

As per Section B.17.21.2 of the T&SC, the Modifications Committee wishes to notify the RAs of the effective date for Mod\_14\_22 Removal of the requirement to post De-registration Consent Orders to be the third Working Day following publication of AP notifications unless a veto is received from the Regulatory Authority. This Notification was published on 23<sup>rd</sup> November 2022.

### 3 LEGAL DRAFTING
