**SEM Committee Decision for the Regulatory Authorities in relation to Mod\_37\_18 (Final Recommendation Report FRR\_37\_18)**

Dear Esther

On 08 February 2019, the Modifications Committee submitted its Final Recommendation Report with regard to Modification Proposal Mod\_37\_18 “Housekeeping between V20 and V21” in accordance with Paragraph B.17.18.1 of Part B of the SEM Trading and Settlement Code (TSC).

The Modification Proposal Mod\_37\_18 was submitted to the Modifications Committee by the Single Electricity Market Operator (SEMO) on 28 November 2018.

The Modification Proposal seeks to remedy a number of general housekeeping items which were identified while preparing version 21 of the Trading and Settlement Code to include all 44 approved Modifications since the previous publication of the Code (version 20).

The Regulatory Authorities note that a presentation was made to the Modifications Committee on 12 December 2018 setting out the requirement for these changes. If this modification is not implemented, then these identified errors and inconsistencies will remain, resulting in diminished accuracy and transparency within the Code, this could lead to inconsistency in the

Trading and Settlement Code and potentially misinterpretation. The Regulatory Authorities note that the members of the Modifications Committee voted on a unanimous basis to approve this modification.

Considering the above, and in accordance with Paragraph B.17.20 of the Code, the SEM Committee direct that a Modification, as set out in Appendix 1 of FRR\_37\_18, is implemented on a Trading Day basis with effect from one Working Day after the date of this letter.

Yours sincerely.
