Capacity Market Platform Development Roadmap

17th September 2025

Capacity Market Platform Qualification (CMPQ)

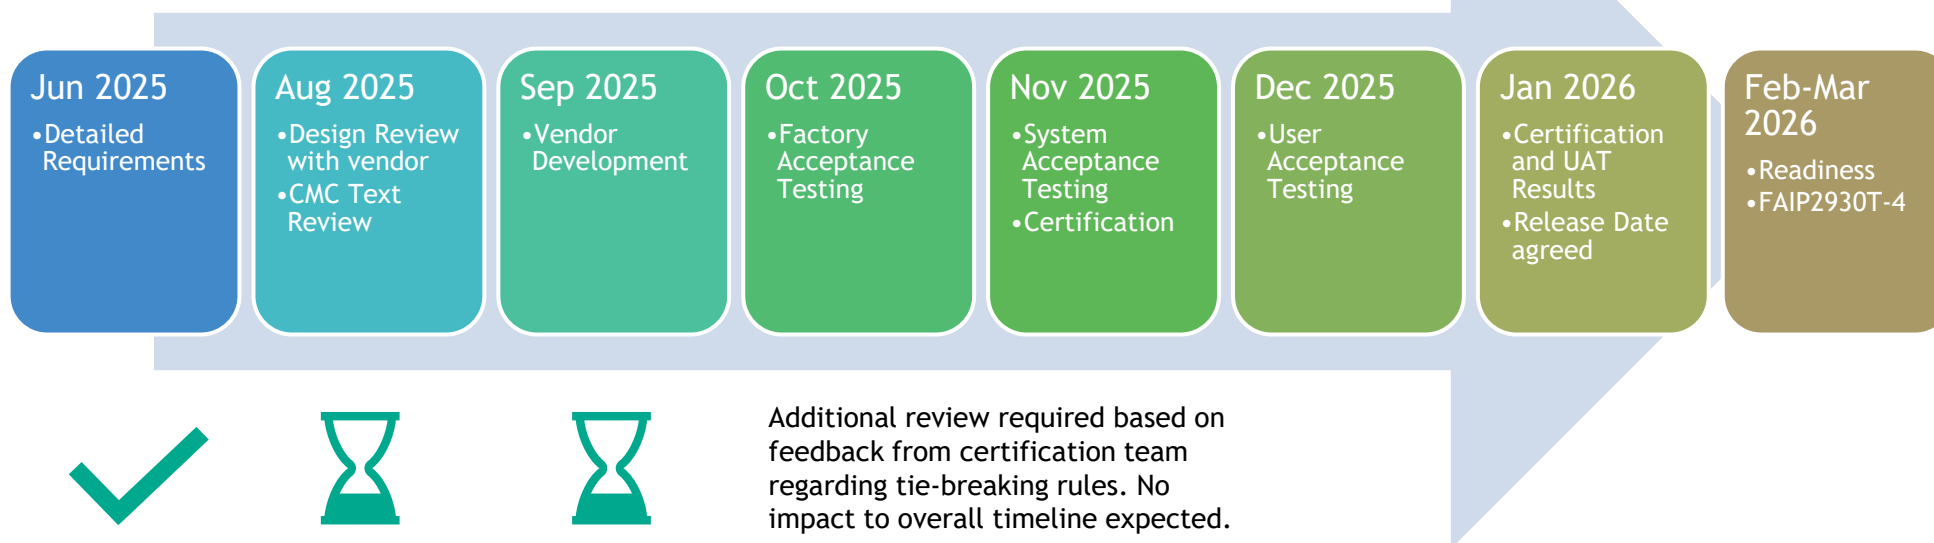

Why is it important? Robust, secure, user-friendly channel required for submission of Applications for Qualification to replace previous email-based submissions.

Outcome: Significant improvement to process. Significant change. Strong engagement from industry in two information sessions and two training sessions in July 2025 and over course of August 2025.

Treatment of Capacity Contracts of Varying Duration in Constrained Auction Solution (CMC_07_24)

Why is it important? Reflect the preference of the Capacity Market design for shorter duration Awarded Capacity.

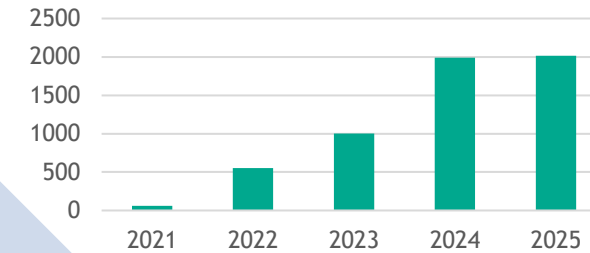

Expected outcomes? High priority give to Exempt Price Quantity Pairs with shorter duration offers based on price x duration. Primacy of one year offers retained.

Online Secondary Trading (CMC_09_22)

Why is it important? Robust, secure, user-friendly channel required for submission of Secondary Trades to replace current email-based submissions.

Total number of Secondary Trades

Jun 2025

- Detailed Requirements

Aug 2025

- Design Review with vendor

Sep 2025

- Vendor Development

Oct 2025

- Factory Acceptance Testing

Nov 2025

- System Acceptance Testing

Dec 2025

- User Acceptance Testing

Jan 2026

- UAT Results
- Release Date agreed

Feb-Mar 2026

- Readiness
- Training
- User Guides
- Go-Live

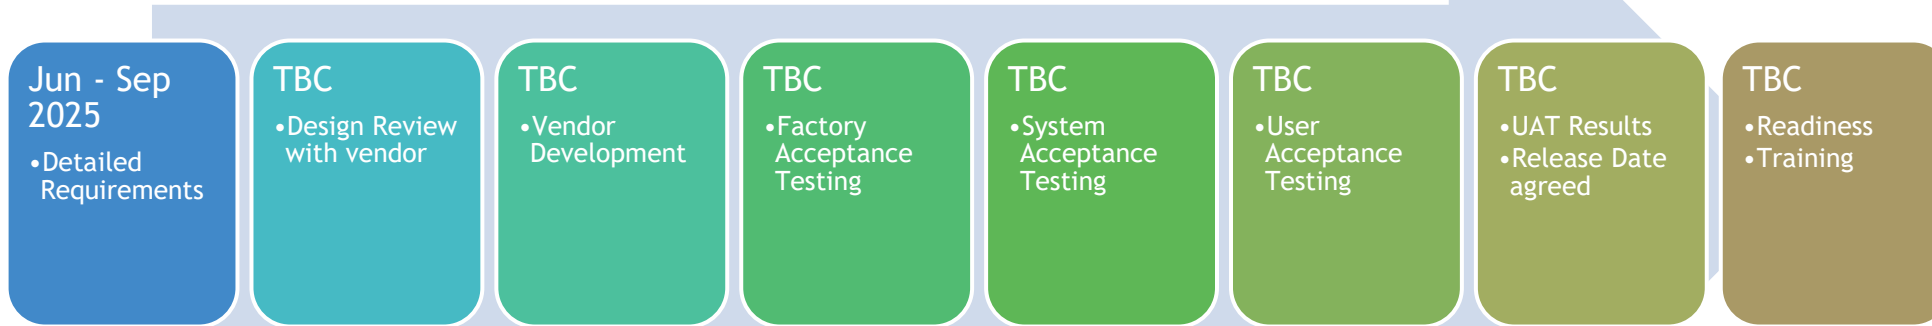

On Track

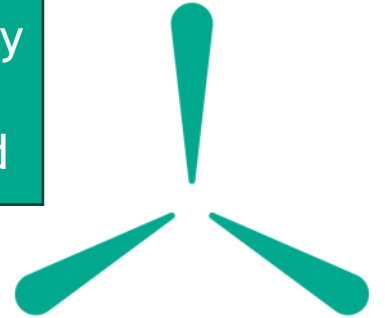

Expect Outcomes - Significant increase in efficiency and user experience. Significant reduction in trading notice times to less than 2 hours. Increased features including open trades.

Secondary Trading above GDRC (CMC_11_21)

Why is it important? Allows Participants to secondary trade above their Gross De-Rated Capacity for up to 70 days of the year.

Online
Secondary
Trading
Required

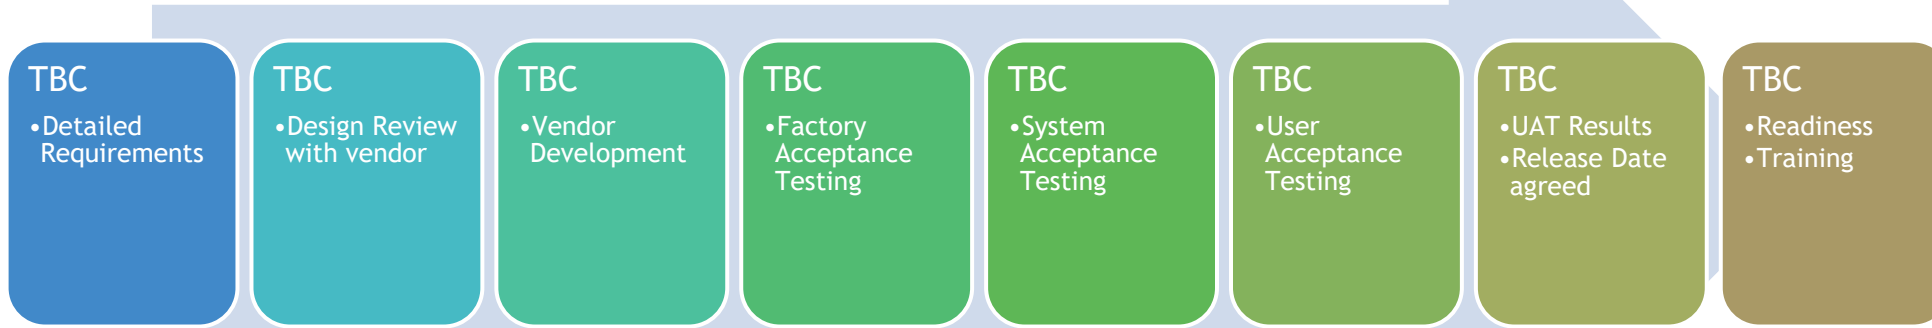

Significant analysis work complete.
Timeline subject to final requirements.

Expected Outcomes: Increased capacity available for secondary trading e.g. a 100 MW wind farm which has GDRC of 6 MW would be able to trade up to 100 MW for 70 days.

Post Auction Improvements

Why is it important? Tracking Awarded New Capacity is increasingly complex due extensions, tech class changes, ILCs, early delivery incentives. More robust, user-friendly system required to manage submissions.

Expected Outcomes: Greater visibility of post auction obligations with more user-friendly submission process.

Thank you
