# Agenda

- Secondary Trading Module in CMP
  - Secondary Trades Overview
  - PLFF
  - Exchange Rate
  - List of Secondary Trades
  - Live presentation
- ASTN (Alternative Secondary Trade Notification)
  - Type of ASTN
  - Creating an ASTN
  - Editing an ASTN
  - Submitting an ASTN
  - Matching an ASTN
  - Live presentation
- ISTN (Interim Secondary Trade Notification)
  - Creating an ISTN
  - Editing an ISTN
  - Submitting an ISTN
  - Live presentation
- Access to CMP
- Questions

# What is Secondary trading

- Secondary trading is when one Capacity Market Unit transfers their contracted capacity obligations to another suitable, qualified Capacity Market Unit. Secondary trading can happen in cases where the holders of contracts are unable to deliver their obligations.
- Secondary Trade Arrangements are set out in section M.12 of Capacity Market Code

# CMP - Capacity Market Platform

The screenshot shows the login page for the Capacity Market Platform. At the top, there is a navigation bar with the URL <https://cmp.eirgrid.com/DMSPSYST01>. Below the navigation bar is a large banner image of a woman in safety glasses pointing at a digital display. The main heading is "Capacity Market Platform" with the subtitle "Auction management platform for the Capacity Market for Ireland and Northern Ireland." Below the banner are the logos for EIRGRID, semo (Energy Services Market Operator), and SONI. The login form includes a "Username\*" field with the value "bochenek\_d@aipsem", a "Password\*" field with the placeholder "Enter your password", a "Login" button, and a "Public access" button. At the bottom, there is a footer with contact information and the Damas logo.

**Capacity Market Platform**  
Auction management platform for the Capacity Market for Ireland and Northern Ireland.

**EIRGRID** **semo** **SONI**

Username\* Password\*  
bochenek\_d@aipsem Enter your password Login Public access

This platform provides a single point of access to the Capacity Auction processes for the Capacity Market of Ireland and Northern Ireland. Access to the Capacity Market Settlement processes takes place through the separate Market Participant Interface for the Balancing Market.

# CMP - Capacity Market Platform

The screenshot shows the CMP Home Page in a web browser. The browser address bar displays "https://cmp.eirgrid.com/HOME\_PAGE". The page header includes logos for EIRGRID, semo, and SONI, along with the date "02/04/2026 10:05 IST" and the user name "Dorota Bochenek". The main content area is titled "Home Page" and features three sections of information:

- 2029/2030 T-4 Capacity Auction Upcoming Milestones**
  - Final Qualification Submission Date **09/02/2026**
  - Final Locational Capacity Constraint Limits Date **04/03/2026**
  - Final Qualification Results Date **04/03/2026**
  - Qualification Results Publication Date **04/03/2026**
  - Final Auction Information Pack Date **04/03/2026**
- 2029/2030 T-4 Capacity Auction Useful Links**
  - 2029/2030 T-4 Capacity Auction Timetable
  - T-4 Capacity Auction Information Session
  - 2029/2030 T-4 Initial Auction Information Pack
  - Application for Qualification in CMP User Guide
  - Capacity-Market-Qualification-Data-Guide-(Read-Me-tab)
  - C33-Capacity-Market-Opt-Out-Notification
  - MCS1 - Manual Confirmation and Signature
  - R2C2 Gas Turbine Information Consent Form
  - C3PA - Confirmation of Planning Approval
- 2026/2027 T-1 Capacity Auction Upcoming Milestones**
  - Qualification Application Opening Date **05/02/2026 CLOSED**
  - Exception Application Date **17/02/2026 CLOSED**
  - Opt-out Notification Date **18/02/2026 CLOSED**

### Reason

- (a) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit is or are undertaking a Planned Outage;
- (b) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit is or are adversely affected by an Outage;
- (c) one or more of the Generator Units comprising the Capacity Market Unit is or are adversely affected by an Ambient Outage;
- (d) one or more Variable Generator Units comprising the Capacity Market Unit is or are adversely affected by:
  - (i) fluctuations in the availability of its primary energy source; or
  - (ii) if the primary energy source for the Variable Generator Unit is wave, tidal or run-of-river hydro energy, a restriction or limitation affecting its capacity to generate arising under a Legal Requirement;
- (e) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit are adversely affected by a condition that the Regulatory Authorities notify the System Operators that they consider to be a Legitimate Reason in respect of the Generator Unit or Interconnector, following an application under paragraph M.11.7.2, during the period the Regulatory Authorities specify in their notice; or
- (f) in the case of paragraph M.11.2.2, if as a result of one or more prior Secondary Trades a Participant's Net Capacity Quantity in respect of the Capacity Market Unit exceeds its total Awarded Capacity allocated in respect of that Capacity Market Unit as a result of a Capacity Auction for the relevant Capacity Year (and as recorded in the Capacity and Trade Register with a Commissioning Status Flag of Actual), and the effect of the proposed Secondary Trade is to cancel the effect of one or more of those prior Secondary Trades on the Net Capacity Quantity, provided that the relevant Secondary Trade Auction is not less than two Working Days prior to the commencement of the forward period over which the relevant Product will apply.

Reason

(a) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit is or are undertaking a Planned Outage;

(b) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit is or are adversely affected by an Outage;

(c) one or more of the Generator Units comprising the Capacity Market Unit is or are adversely affected by an Ambient Outage;

(d) one or more Variable Generator Units comprising the Capacity Market Unit is or are adversely affected by:

(i) fluctuations in the availability of its primary energy source; or

(ii) if the primary energy source for the Variable Generator Unit is wave, tidal or run-of-river hydro energy, a restriction or limitation affecting its capacity to generate arising under a Legal Requirement;

(e) one or more of the Generator Units or the Interconnector comprising the Capacity Market Unit are adversely affected by a condition that the Regulatory Authorities notify the System Operators that they consider to be a Legitimate Reason in respect of the Generator Unit or Interconnector, following an application under paragraph M.11.7.2, during the period the Regulatory Authorities specify in their notice; or

(f) in the case of paragraph M.11.2.2, if as a result of one or more prior Secondary Trades a Participant's Net Capacity Quantity in respect of the Capacity Market Unit exceeds its total Awarded Capacity allocated in respect of that Capacity Market Unit as a result of a Capacity Auction for the relevant Capacity Year (and as recorded in the Capacity and Trade Register with a Commissioning Status Flag of Actual), and the effect of the proposed Secondary Trade is to cancel the effect of one or more of those prior Secondary Trades on the Net Capacity Quantity, provided that the relevant Secondary Trade Auction is not less than two Working Days prior to the commencement of the forward period over which the relevant Product will apply.

# Live presentation

# Accessing the Capacity Market Platform (CMP)

# Capacity Market Platform (CMP) - Access

All Capacity Qualifications and Auctions take place on an internet-based program known as the Capacity Market Platform (CMP).

Access is granted to CMP via the registration process. All users will require a username, password, and digital certificate to log into the CMP successfully.

There are three different user role types within CMP: Trading, Reporting and Administrative Users.

Guides for each user role type can be found via the following links:

[CMPT Capacity Market Participant - Trading User](#)

[CMPR Capacity Market Participant - Reporting User](#)

[CMPA Capacity Market Participant - Administrator User](#)

To log into CMP, you must first have a user account set up in CMP. You must also be a participant in the Capacity Market - access is only granted to those of this status.

# Existing Party to Capacity Market

- If you are an Existing Party adding a new user, you must contact your current PAU/s to set up your user account on CMP first.
- Guides are available on CMP at the main menu drop down if required.
- Once the PAU has set up your user account, you need to contact the capacity team to issue a certificate to install. Once the certificate is installed you need to advise the team of the full serial number (copied and pasted) and the valid to and from date. Once we receive that information we will then advise of your password.
- If you require an additional PAU to be added, or to remove a PAU you must submit a [C02](#) or [C03](#) form, respectively.

# New Party to Capacity Market

- If you are a New Party, requesting access, **this** is done by contacting the Capacity Market Team via email and submitting the relevant [C02](#) form (C02 Capacity Market - Party Administrative User (PAU) Authorisation) located on the SEMO website.
- Once the form is received and processed, we will add the relevant PAU/s (**Party Administrative User**) to our records. We will also contact our IT team to issue a certificate to install.
- Once the certificate email is received this must be installed within 10 working days or it will expire, and you will have to contact us again to resend.
- Once the certificate is installed you need to advise the team of the full serial number (copied and pasted) and the valid to and from date. Once we receive that information we will then advise of your password.
- If you require an additional PAU to be added, or to remove a PAU you must submit a [C02](#) or [C03](#) form, respectively.

# Certificates

Each Certificate is valid for a period of approximately 1 year.

Any time a new Certificate is installed you need to advise the team of the full serial number and the valid to and from date.

Guides for installing a Certificate or providing serial numbers below:

[How to get certificate details \(as Web Page\)](#)

[Export, Import and Renew Security Certificates\\_PKI.PDF](#)

30 days before expiry your Certificate will update in PKI Client. These details need to be inputted into CMP.

You will not be able to access the system if you don't update your new Certificate details. This can be done by a PAU or by contacting the capacity team. You can check when your cert is about to expire in PKI.

# Questions?
